Cautionary Notes

Forward-Looking Statements

This presentation contains forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 and forward-looking information within the meaning of applicable Canadian securities laws (together, "forward-looking statements") concerning Alexco's business, including but not limited to statements with respect to results of the independent pre-feasibility study on Alexco's Keno Hill Silver Project in Yukon, Canada (the "PFS" or the "2019 PFS"); future mineral exploration including the estimation of mineral reserves and mineral resources and the realization of mineral reserve and mineral resource estimates; future mine construction and development activities; future mine operation and production; the timing of activities and reports; the amount of estimated development and operational expenses; projected operational and economic metrics; the success of exploration and development activities; the potential upside and growth in respect of certain deposits comprising the Keno Hill Silver Project; anticipated permitting time lines; anticipated installation of certain infrastructure; projected equipment and production capacity; and potential capital, revenue and sources and uses of funds. Forward-looking statements are subject to a variety of known and unknown risks, uncertainties and other factors which could cause actual events or results to differ from those expressed or implied by the forward-looking statements. Such factors include, among others, risks related to actual results and timing of exploration and development activities; actual results and timing of mining activities; actual results and timing of environmental services activities; actual results and timing of remediation and reclamation activities; conclusions of economic evaluations; changes in project parameters as plans continue to be refined; future prices of silver, gold, lead, zinc and other commodities; possible variations in mineable resources, grade or recovery rates; failure of plant, equipment or processes to operate as anticipated; accidents, labour disputes and other risks of the mining industry; First Nation rights and title; continued capitalization and commercial viability; global economic conditions; competition; and delays in obtaining governmental approvals or financing or in the completion of development activities. Forward-looking statements are based on certain assumptions that management believes are reasonable at the time they are made. In making the forward-looking statements included in this news release, Alexco has applied several material assumptions, including, but not limited to, the assumption that Alexco will be able to raise additional capital as necessary, that the assumptions, projections and estimates in the PFS will proceed as planned, and that market fundamentals will result in sustained silver, gold, lead and zinc demand and prices. There can be no assurance that forward-looking statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Alexco expressly disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except as otherwise required by applicable securities legislation. Alexco does not intend, and does not assume any obligation, to update these forward-looking statements, except as required by applicable law. To the extent that such information may constitute a financial outlook within the meaning of applicable securities laws, such information has been approved by management and is provided for the purposes of providing information relating to management and Alexco's current expectations and plans. Readers are cautioned that any such financial outlook information contained herein should not be used for purposes other than for which it is disclosed herein.

The PFS was compiled by Mining Plus with contributions from a team of Qualified Persons as defined by National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101") as follows: Zach Allwright, P.Eng. of Mining Plus, Adrian Churcher, P.Eng. of Mining Plus, Hassan Ghaffari, P.Eng. of TetraTech, Paul Hughes, PhD, P.Eng. of Mining Plus, Gilles Arseneau, Ph.D., P.Geo. of SRK Canada Inc., Cliff Revering, P. Eng. of SRK Canada Inc. All mineral resources are classified following the CIM Definition Standards for Mineral Resources and Mineral Reserves (May 2014), in accordance with the CIM Estimation of Mineral Resources and Mineral Reserves Best Practice Guidelines and NI 43-101.

The disclosure in this presentation of scientific and technical information regarding exploration has been prepared by or under the supervision of Alan McOnie, FAusIMM, Alexco's Vice President, Exploration, while that regarding mine development and operations has been prepared by or under the supervision of Neil Chambers, P.Eng., Mine Superintendent, each of whom is a Qualified Person as defined by NI 43-101 and has approved the disclosure herein. The technical information in this document was reviewed by Zach Allwright, P.Eng. and Adrian Churcher, P.Eng. both of Mining Plus, Gilles Arseneau, Ph.D., P.Geo. and Cliff Revering, Ph.D., P. Geo both of SRK Canada Inc. and Hassan Ghaffari, P.Eng. of Tetra Tech, each of whom is a Qualified Person and has approved the disclosure herein.

TECHNICAL DISCLOSURE CAUTIONARY STATEMENT

The PFS as summarized in Alexco's news release dated March 28, 2019 titled "Alexco Announces Positive Pre-Feasibility Study for Expanded Silver Production at Keno Hill Silver District" (the "PFS News Release") and this presentation was compiled by Mining Plus Canada Consulting Ltd. with contributions by a team of Qualified Persons as set out in the PFS News Release and will be incorporated into a NI 43-101 technical report which will be filed on SEDAR under Alexco's profile within 45 days of the PFS News Release. References to information contained in the "PEA" or "2017 PEA" in this presentation pertain to the technical report dated March 29, 2017 with an effective date of January 3, 2017, as amended September 14, 2018, titled "Technical Report Preliminary Economic Assessment of the Keno Hill Silver District Project, Yukon Territory, Canada". All disclosure contained in this presentation regarding the mineral resource and reserves estimates and economic analysis on the property is fully qualified by the full disclosure contained in the PEA and the PFS as applicable.

Readers are cautioned that mineral resources are not mineral reserves and do not have demonstrated economic viability. A production decision which is made without a feasibility study of mineral reserves demonstrating economic and technical viability carries additional potential risks which include, but are not limited to, the risk that additional detailed work may be necessary with respect to mine design and mining schedules, metallurgical flow sheets and process plant designs, and the noted inherent risks pertaining to the inclusion of approximately 2% inferred mineral resources in the mine plan.

This presentation has been prepared in accordance with the requirements of the securities laws in effect in Canada, which differ from the requirements of United States securities laws. The terms "mineral reserve", "proven mineral reserve" and "probable mineral reserve" are Canadian mining terms as defined in accordance with NI 43-101 and the Canadian Institute of Mining, Metallurgy and Petroleum (the "CIM") - CIM Definition Standards on Mineral Resources and Mineral Reserves, adopted by the CIM Council, as amended. These definitions differ materially from the definitions in SEC Industry Guide 7 ("SEC Industry Guide 7") under the United States Securities Act of 1933, as amended. Under SEC Industry Guide 7 standards, a "final" or "bankable" feasibility study is required to report reserves, the three-year historical average price is used in any reserve or cash flow analysis to designate reserves, and the primary environmental analysis or report must be filed with the appropriate governmental authority. In addition, the terms "mineral resource", "measured mineral resource", "indicated mineral resource" and "inferred mineral resource" are defined in and required to be disclosed by NI 43-101; however, these terms are not defined terms under SEC Industry Guide 7 and are normally not permitted to be used in reports and registration statements filed with the SEC. Investors are cautioned not to assume that all or any part of a mineral deposit in these categories will ever be converted into SEC Industry Guide 7 reserves. "Inferred mineral resources" have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an inferred mineral resource will ever be upgraded to a higher category. Under Canadian rules, estimates of inferred mineral resources may not form the basis of feasibility or pre-feasibility studies, except in rare cases. Investors are cautioned not to assume that all or any part of an inferred mineral resource exists or is economically or legally mineable. It is reasonably expected that the majority of inferred mineral resources could be upgraded to indicated mineral resources with continued exploration. Disclosure of "contained ounces" in a resource is permitted disclosure under Canadian regulations; however, the SEC normally only permits issuers to report mineralization that does not constitute "reserves" by SEC Industry Guide 7 standards as in place tonnage and grade without reference to unit measures. Accordingly, information contained in this presentation regarding descriptions of the Corporation's mineral deposits may not be comparable to similar information made public by U.S. companies subject to the reporting and disclosure requirements under the United States federal securities laws and the rules and regulations thereunder, including SEC Industry Guide 7.

Investment Highlights

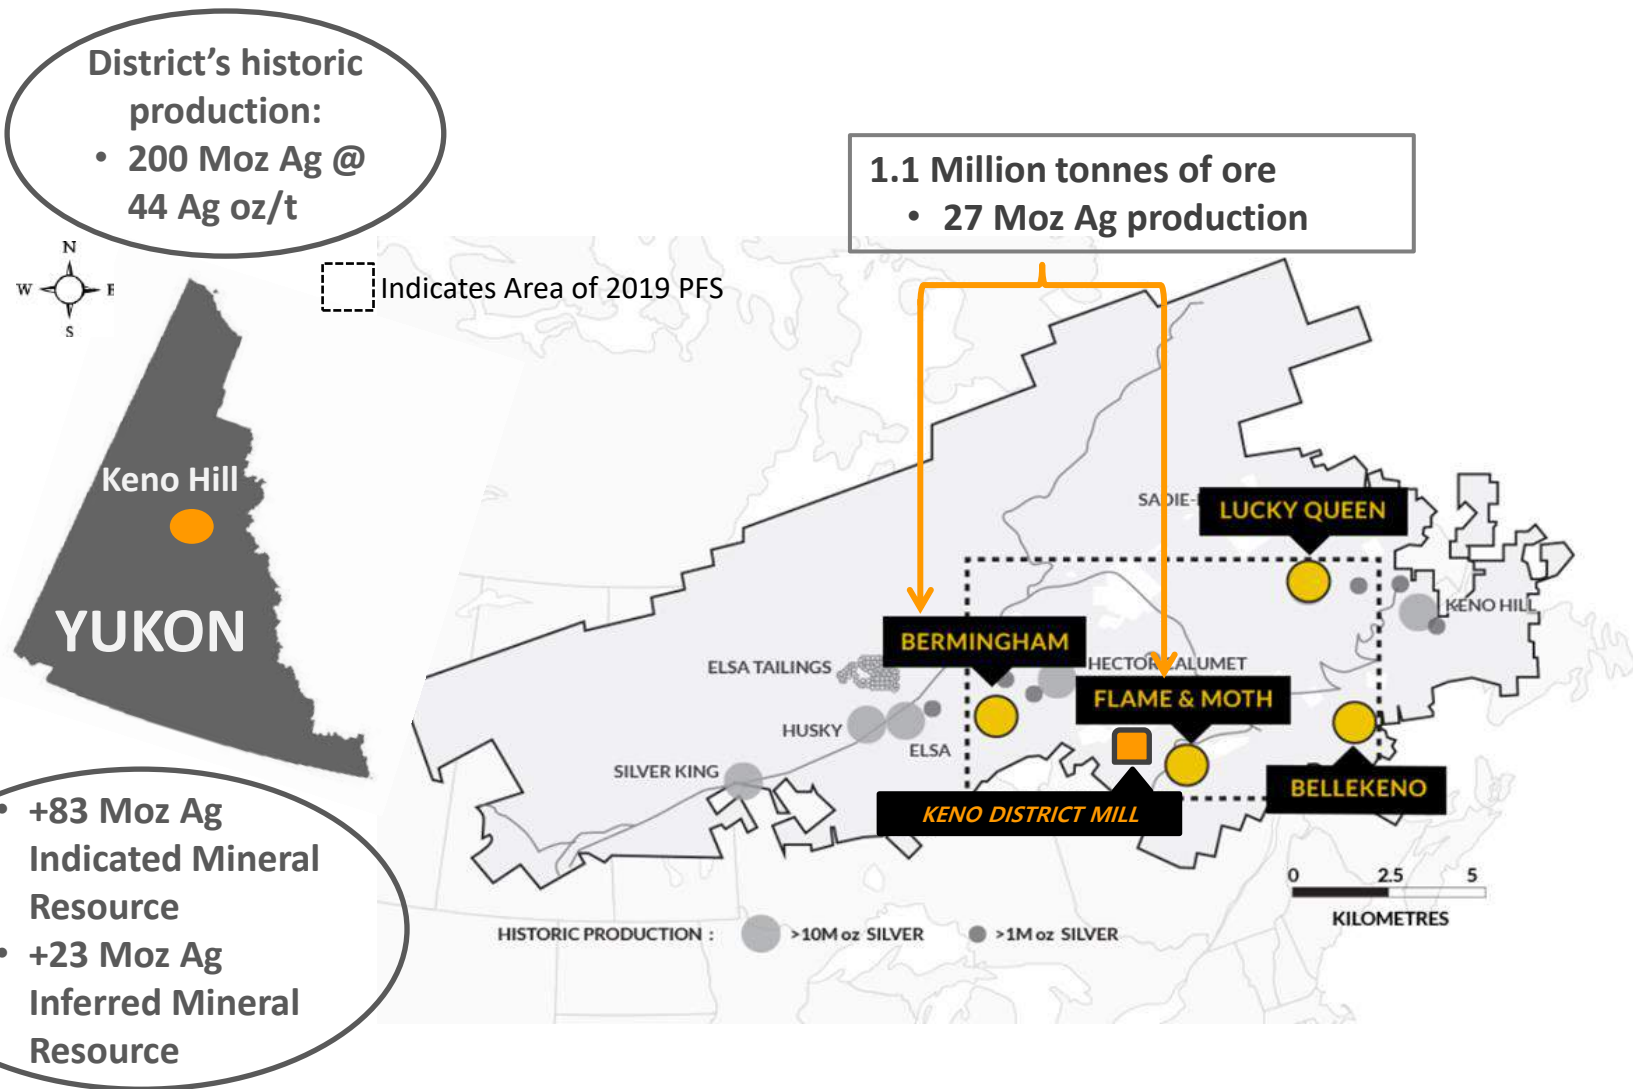

- Entire silver district in safe jurisdiction
- Positive PFS announced in Q1 2019
- Moving to production, ~4 Moz Ag/yr
- Scaleable
- Proven exploration upside
- Profitable subsidiary environmental business
- Leverage to SILVER

***On a track to become Canada's only
Primary Silver Producer***

Keno Hill Silver District

Located in the traditional territory of First Nation of Na-Cho Nyak Dun

District's historic production:

- 200 Moz Ag @ 44 Ag oz/t

1.1 Million tonnes of ore

- 27 Moz Ag production

Indicates Area of 2019 PFS

- +83 Moz Ag Indicated Mineral Resource
- +23 Moz Ag Inferred Mineral Resource

2019 Pre-Feasibility Study (“PFS”) Results

- ✓ 1.18 M tonnes of ore at 804 g/t Ag. 8-year mine-life
- ✓ Annualized Ag in concentrate 4.0 Moz
- ✓ Average throughput 430 tpd

- ✓ Initial capital costs of \$23.2 M comprising
 - \$17.9 M mine development, PP&E
 - \$5.3 M working capital

- ✓ Average LOM NSR \$554/t of ore
- ✓ Direct operating costs of \$321/t of ore
- ✓ LOM AISC Ag of US\$10.86/oz ¹

- ✓ Pre-tax NPV₅ \$136.4 M
- ✓ After-tax NPV₅ \$101.3 M
- ✓ Pre-tax IRR 84%
- ✓ After-tax IRR 74%

- ✓ Project de-risked

***A robust project
in today’s pricing
environment
with longer-term
scaleability and
growth
opportunities***

Low Capex

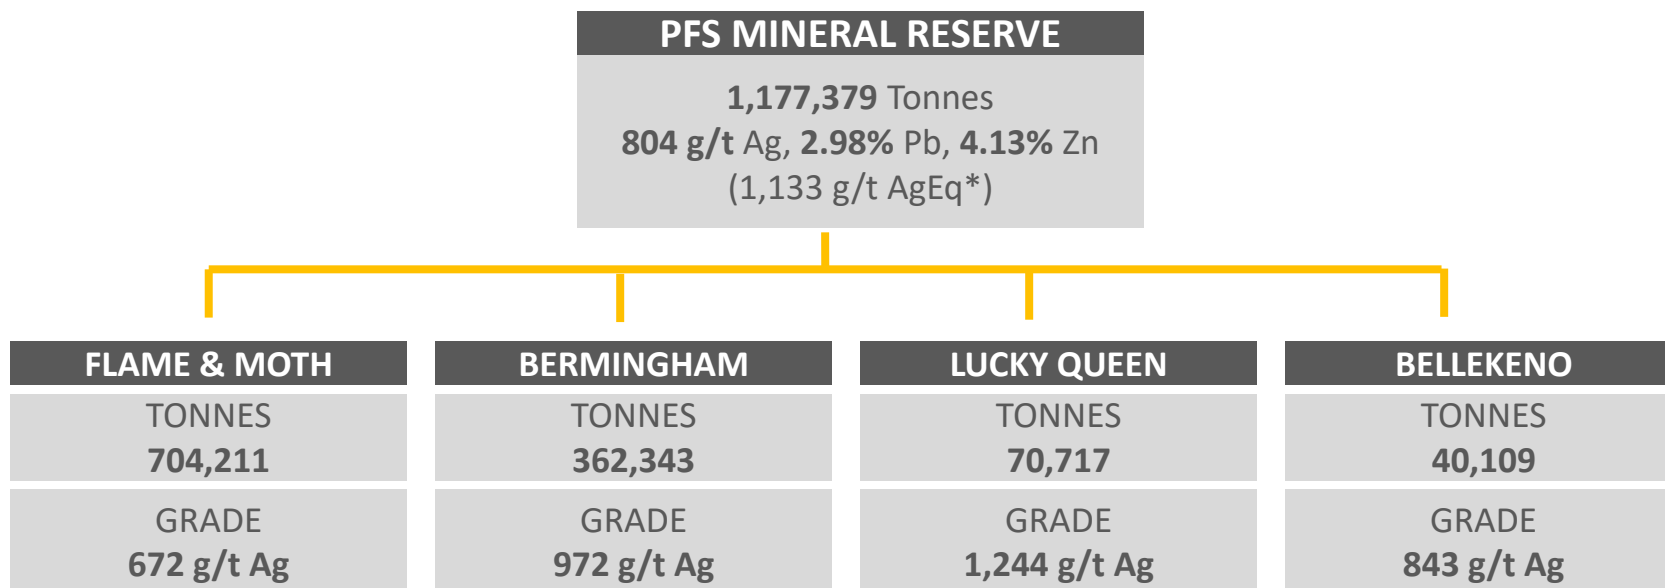

High Return

¹ Calculated as of March 22, 2019 assuming Ag US\$ 15.46/oz, AU US\$ 1,311.30/oz, Pb US\$ 0.9187/lb, Zn US\$ 1.2961/lb, and US\$/CAD FX of \$0.7457

See slide 2 for PFS cautionary statement, news release dated March 28, 2019 entitled “Alexco Announces Pre-Feasibility Study for Expanded Silver Production at Keno Hill Silver District”

Keno Hill Silver District

LOM Tonnes and Grade by Deposit

* Calculated at the following prices: Ag US\$ 17.65/oz, Au US\$ 1,322.55/oz, Pb US\$ 1.00/lb, Zn US\$ 1.25/lb

Appendix I

Summary of Mineral Reserves & Resources Estimates

MINERAL RESERVES

Category ^{1, 2, 4}	Property	Tonnes	Ag (g/t)	Au (g/t)	Pb (%)	Zn (%)	Contained Ag (oz)
<i>Probable</i> ³	Bellekeno ⁴	40,109	843	-	11.8%	6.3%	1,087,000
	Lucky Queen ⁴	70,717	1,244	0.12	2.6%	1.4%	2,828,000
	Flame & Moth ⁴	704,211	672	0.49	2.7%	5.7%	15,215,000
	Birmingham ⁴	362,343	972	0.13	2.6%	1.3%	11,324,000
Total Mineral Reserves		1,177,379	804	0.34	3.0%	4.1%	30,454,000

- All mineral reserves have the effective date of March 28, 2019 and are classified following the CIM Definition Standards for Mineral Resources and Mineral Reserves (May 2014), in accordance with the CIM Estimation of Mineral Resources and Mineral Reserves Best Practice Guidelines and the guidelines of NI 43-101.
- All numbers have been rounded to reflect the relative accuracy of the estimates.
- The Bellekeno, Lucky Queen, Flame & Moth and Birmingham deposits are incorporated into the current mine plan supported by disclosure in the news release dated March 28, 2019 entitled "Alexco Announces Positive Pre-Feasibility Study for Expanded Silver Production at Keno Hill Silver District".
- The disclosure regarding the summary of probable mineral resources for Alexco's mineral properties within the Keno Hill District has been reviewed and approved by Neil Chambers, P.Eng., Mine Superintendent and a Qualified Person as defined by NI 43-101.

MINERAL RESOURCES

Category ^{1, 2, 3, 9}	Property	Tonnes	Ag (g/t)	Au (g/t)	Pb (%)	Zn (%)	Contained Ag (oz)
<i>Indicated</i>	Bellekeno ^{2, 4&5}	262,000	585	n/a	3.5%	5.3%	4,928,000
	Lucky Queen ^{2, 4&6}	132,300	1,167	0.2	2.4%	1.6%	4,964,000

	Onek ^{4&6}	700,200	191	0.6	1.2%	11.9%	4,300,000
	Birmingham ^{2, 4&7}	1,102,300	930	0.1	2.4%	1.7%	32,959,000
Total Indicated Sub-Surface Deposits		3,875,800	594	0.34	2.0%	5.3%	74,034,000
	Elsa Historical Tailings ⁸	2,490,000	119	0.1	1.0%	0.7%	9,527,000
Total Indicated All Deposits		6,915,000	378	0.2	1.5%	3.3%	83,561,000
<i>Inferred</i>	Bellekeno ^{4&5}	243,000	428	n/a	4.1%	5.1%	3,344,000
	Lucky Queen ^{4&6}	257,900	473	0.1	1.0%	0.8%	3,922,000
	Flame & Moth ^{4&6}	365,200	356	0.3	0.5%	4.3%	4,180,000
	Onek ^{4&6}	285,100	118	0.4	1.2%	8.3%	1,082,000
	Birmingham ^{4&7}	509,400	717	0.2	1.7%	1.5%	11,360,000
Total Inferred		1,767,750	455	0.2	1.6%	3.7%	23,888,000

- All mineral resources are classified following the CIM Definition Standards for Mineral Resources and Mineral Reserves (May 2014) of NI 43-101.
- Indicated mineralization is inclusive of mineral reserves estimates.
- Mineral resources are not mineral reserves and do not have demonstrated economic viability. All numbers have been rounded to reflect the relative accuracy of the estimates.
- The mineral resource estimates comprising Bellekeno, Lucky Queen and Flame & Moth, Onek and Birmingham are supported by disclosure in the news release dated March 29, 2017 entitled "Alexco and Silver Wheaton Amend Silver Purchase Agreement and Alexco Announces Positive Preliminary Economic Assessment for Expanded Silver Production at Keno Hill" and the technical report filed on SEDAR dated March 29, 2017 with an effective date of January 3, 2017. The mineral resource estimate for Birmingham has been updated by disclosure in note 7 below.
- The mineral resource estimate for the Bellekeno deposit is based on a geologic resource estimate having an effective date of September 30, 2012. The Bellekeno indicated mineral resources are as at September 30, 2013, and reflect the geologic resource less estimated subsequent depletion from mine production.
- The mineral resource estimate for the Lucky Queen, Flame & Moth and Onek deposits have an effective date of January 3, 2017.
- The resource estimate for the Birmingham deposit has an effective date of March 28, 2019 and is supported by disclosure in the news release entitled "Alexco Announces Positive Pre-Feasibility Study for Expanded Silver Production at Keno Hill Silver District".
- The mineral resource estimate for the Elsa Tailings has an effective date of April 22, 2010, and is supported by the technical report dated June 16, 2010 entitled "Mineral Resource Estimation, Elsa Tailings Project, Yukon, Canada".
- The disclosure regarding the summary of estimated mineral resources for Alexco's mineral properties within the Keno Hill District has been reviewed and approved by Neil Chambers, P.Eng., Mine Superintendent and a Qualified Person as defined by NI 43-101.

Appendix IV

Leverage to Silver

Appendix V

The Silver Market 2018

Total Physical Demand: 1.00 Billion Oz

- Up 4% to 3-year high
- Coin + bar demand rose 20%
 - India +115%
- Jewelry demand up 4%
 - India +16%
 - US +7%
- Silverware demand up 6%
 - India +10%
 - Turkey +20%
- Industrial demand down 1%
 - Photovoltaic -9%
 - Electronics & electrical +2%

Total Physical Supply: 1.03 Billion Oz

- Down 2%
- Mine supply down 2% for 3rd consecutive year
 - Primary Ag mines down 7%
 - Primary Ag mines produce 26% world supply
 - NA supply down 6%
 - Mexico & Peru 1st and 2nd largest producers
- Scrap supply down 2% on low prices
- Above-ground stocks down 3%

Average Silver price down 8% to US\$15.71/oz due to:

- Rising US\$
- Rising interest rates
- US/China trade dispute
- Lower world GDP growth
