

PROJECT ENGINEER

ABOUT US:

Alexco Resource Corp. owns the majority of the historic high-grade Keno Hill Silver District located in Canada's Yukon Territory, in the traditional territory of the First Nation of Na-Cho Nyak Dun. Alexco is currently in production starting the year 2020. In parallel, Alexco's wholly owned subsidiary ERDC (the Elsa Development and Reclamation Company) is implementing a district wide reclamation project to address the historic environmental liabilities, in partnership with the federal, territorial and First Nation of Na-Cho Nyak Dun governments. Alexco is committed to the responsible and sustainable development of Keno Hill. Our values drive us to achieve excellence in all that we do, while supporting the communities and organizations in the areas in which we work.

Alexco is seeking a Project Engineer to join the management team for the District Reclamation Project as we advance through final design and into construction.

JOB DESCRIPTION:

Reporting to the V.P. Technical Services, the Project Engineer will be part of our small and committed team who, with our expert consultants, have worked together for many years to advance this reclamation plan. The successful candidate will have a combination of practical experience in the resource industry, as well as a keen interest in the range of environmental disciplines relevant to both mine reclamation and mining operations.

The responsibilities of the Project Engineer will include but not be limited to the following:

- Completion of the final and comprehensive reclamation plan including reclamation cost modelling;
- Day-to-day management of the engineering design consultants;
- Development of the project execution plan;
- Managing project delivery and reporting; and,
- Working closely with the environmental team to support permitting and licensing.

As we advance into construction, the Project Engineer will work with the Construction Project Manager to build the team and the processes to execute the reclamation project. You will also support the on-site care and maintenance activities and, where time permits, support mine operations in your areas of technical expertise.

This full-time permanent position is based in Vancouver, BC and will require travel and work on site at our Keno Hill Project in Elsa, Yukon particularly during the construction season.

QUALIFICATIONS:

- Bachelor of Science in mining, civil or environmental engineering, or equivalent;
- Professional designation in Canada and eligible for registration in Yukon;
- At least six years' experience in mining environmental and mine reclamation work;
- Proven ability to work on multi disciplinary projects, synthesize information, and develop reports;
- Experience in project scheduling, costing, work planning and reporting; and
- Strong commitment to environment, safety and working with our communities.

CONTACT:

Alexco offers a competitive remuneration package consisting of a retirement savings plan, extended group health and medical insurance.

Interested candidates should e-mail their cover letter and resume to hr@alexcoresource.com indicate on the subject line: **ERDC Project Engineer**. No telephone calls please. Only successful candidates will be contacted.
