

WATER TREATMENT SAMPLER

OVERVIEW

Alexco Resource Corp. owns the majority of the historic high-grade Keno Hill Silver District located in Canada's Yukon Territory. With nearly 1,000 meters of underground development completed at our two new deposits and a robust Pre-Feasibility Study released, Alexco is advancing the district towards a production decision with the goal of production in Q4 2020. This is a great opportunity to be part of the team that is building one of the highest-grade silver operations in the world.

We are looking for an individual to join our growing team. The role of a **Water Treatment Sampler**.

REQUIREMENTS

- Perform tasks as directed by the manager;
- Report problems and recommend improvements in process;
- Maintain the chemical storage area for waste and coordinate waste shipments and complete proper paperwork;
- Assist with the implementation and interpretation of safety programs;
- Performs housekeeping duties as assigned, and assures the security of water utility structures and property;
- Analysis testing and checking of systems and equipment;
- Coordinate waste shipments and complete proper paperwork for all waste shipments;
- Maintain the chemical storage area for waste and ensure all waste is properly labeled and contained;
- Performs other duties as assigned.

REQUIREMENTS

- Ability to follow all policies and procedures;
- Knowledge of basic laboratory skills;
- Ability to establish and maintain cooperative working relationships with others;
- Ability to work independently as well as with teams;
- High school/GED or equivalent;
- Two (2) years of water/wastewater treatment experience;
- Possess or received a provisional certification in water or wastewater treatment;
- Two (2) years of water/wastewater treatment experience within a mill/underground mining operation.
