

Mine Superintendent

OVERVIEW

Alexco Resource Corp. owns the majority of the historic high-grade Keno Hill Silver District located in Canada's Yukon Territory. We are developing two underground new deposits; the Bermingham mine and the Flame & Moth mine. The initial ore production at Bermingham mine was achieved in August 2021 and continues to further scale-up underground activities. The underground development continues at the Flame & Moth mine; Alexco is advancing the district towards full production. This is a great opportunity to be part of the team that is operating one of the highest-grade silver operations in the world.

We are looking for an individual to join our growing team. The **Mine Superintendent** will report to the Mine Manager. Your primary responsibility will be overseeing the effective, safe, and cost-efficient extraction of ore and waste from the underground mines. You will work closely with engineering and geology to coordinate the development and execution of short range mine plans.

This is a 14 day on / 14 day off rotation at our Keno Hill Mine Operations in Elsa, Yukon.

RESPONSIBILITIES

- Direct and manage all mine production activities in Flame Moth and Bermingham mine
- Liaise with mining contractor
- Manage staffing levels according to budget to maximize efficient mining operations
- Participate in the selection of mine and mobile maintenance staff in conjunction with HR
- Direct front line supervision with regards to annual, monthly, and daily production objectives
- Ensure Alexco's safety and environmental values are always adhered to by all subordinates
- Ensure mining and mine maintenance operations follow all regulatory compliance requirements
- Oversee and optimize cut and fill mining cycles through experience and knowledge
- Oversee and optimize longitudinal stope mining cycles through experience and knowledge
- Optimize ground support strategies in longitudinal stopes to maximize NSR
- Oversee and optimize CRF back fill processes through experience and knowledge
- Oversee and optimize shotcrete processes through experience and knowledge
- Oversee and manage mine production and incentive programs
- Develop and implement a training system and competencies for miners and mobile maintenance personnel leading to continual advancement of knowledge by department workforce
- leadership to the team
- Acting as Mine Manager in their absence

REQUIREMENTS

- University degree in Mining Engineering, equivalent engineering degree or equivalent experience in a similar role

- 15 years related mining experience required
- Minimum 8 years supervisory experience
- Strong working knowledge of narrow vein mining methods, backfill, ground support methods and procedures
- Proven knowledge of applicable legislation and regulations for mines and mining plants in the Yukon
- Organized and critical thinker
- Proficient in Microsoft Office
- Strong written and verbal communication skills
